

## Shunt resistor 0.1 $\boldsymbol{\Omega}$

## 7005

- $-0.1 \Omega$ , ±1%, 20 W
- Max. working voltage: 550 Volt
- Connection: solder terminals

## Application

• External shunt resistor in connection with the universal AC/DC transmitter type 4179 or trip amplifier type 2231.

## Load

- 12.5 W without heat sink.
- 25 W with 535 cm[sup]2[/sup] x 1 mm heat sink.
